*"Light is the first of painters
There is no object so foul that intense
light will not make it beautiful"*
—Emerson

F O R E W O R D

THIS CATALOGUE of Illuminating Glassware has been compiled for the special requirements of the fixture trade and particular attention has been given to the staple line. Many changes have occurred during the past few years in the fixture business and we feel that a renewal of the use of glassware illustrated in this book means increased business and profit.

CUT ILLUMINATING GLASSWARE All cut glass from our shops is strictly hand cut and by skilled men glass cutters. The blanks are of pure lead glass. The cuttings are brilliantly polished.

DECORATED GLASSWARE Our studios are first class in every particular. Prominent artists of international reputation are in our service as designers and decorators. All color decorations are applied by hand whether Grecian Italian French English Japanese Chinese or Modern.

ETCHED GLASSWARE The etchings shown are limited in number but all good. Special etchings to order.

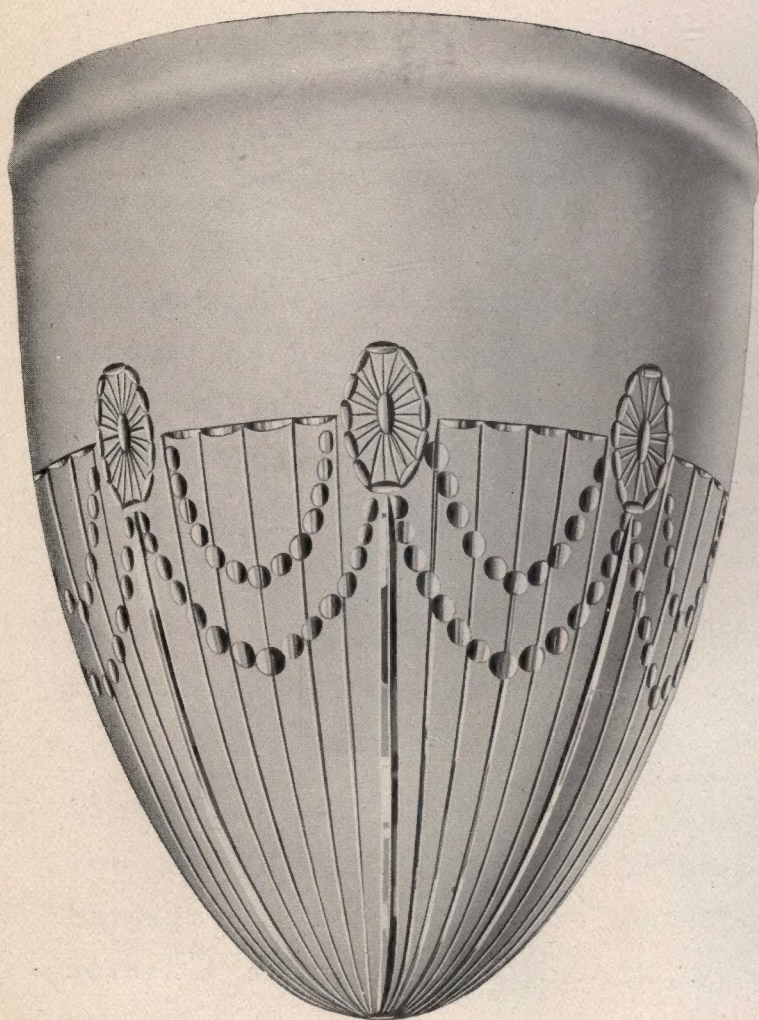

SAND BLASTED GLASSWARE This line usually is dismissed by selling it below cost. However we may say greater value is given by us for the reason that only pure lead glass blanks are furnished and the finish and sand blasting receive the same attention given to more expensive product.

A black and white photograph of a ceramic jar, likely a storage container for tea or tobacco. The jar has a wide, slightly flared rim and a central vertical slot or opening. On either side of this slot, there is a large, stylized floral or starburst design. Each design consists of a central point from which numerous lines radiate outwards, ending in small, teardrop-shaped petals or leaves. The overall appearance is that of a traditional East Asian ceramic vessel.

*No. 468 has 1 $\frac{1}{2}$ inch hole in bottom.

Ionian Glass, being dense in color, is especially adapted for use with Nitrogen Lamps.

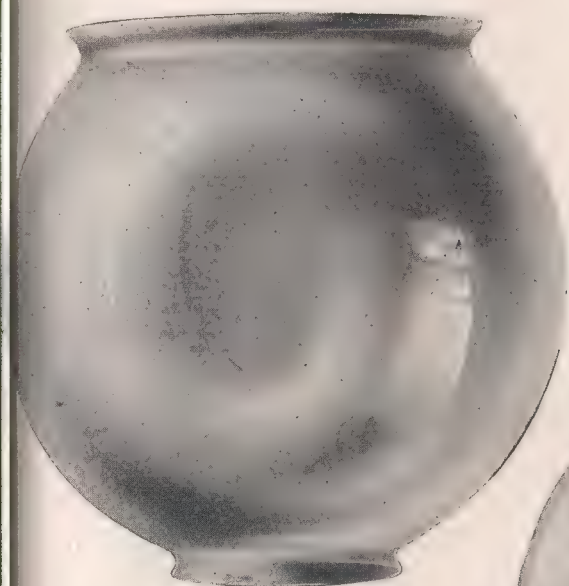

S B I—Sand Blasted Inside. S B O—Sand Blasted Outside.

Holes drilled as specified—extra price charged—based on size of article to be drilled and quantity ordered.
